This paper reviews briefly the early history of archaeological chemistry, concluding that it is to be traced back to Revolutionary France and the last decade of the 18th century. This period saw a unique combination of the perfection of gravimetric means of chemical analysis and an interest in the contents of the 'cabinets of curiosities' of the day, which included archaeological objects ...

Search Tips. Phrase Searching You can use double quotes to search for a series of words in a particular order. For example, "World war II" (with quotes) will give more precise results than World war II (without quotes). Wildcard Searching If you want to search for multiple variations of a word, you can substitute a special symbol (called a "wildcard") for one or more letters.
