Cyberquery Pricing & Cost - Why 3.4/10? | ITQlick
Invented in 1980, Cyberquery is a declarative "4GL" fourth-generation programming language. Its early design was slightly influenced by RAMIS and other data access and analysis languages such as the query language on GE time sharing systems. Cyberquery automates the process of accessing files or tables and reading records or rows.

The Radio Kit affects all mobs spawned in a 64-block radius horizontally, covering an impressive 3217 square blocks. It has a 10% chance to convert normal Zombie spawns inside this radius into Cyberzombie spawns. 50% of converted spawns will be Cyberzombie Brutes.

Getting Started (Cyberware) - Official Feed The Beast Wiki
With regard to integrating Cyberquery with QAD it can be done but it is what I would consider extremely hacky. Also, you won't find anyone at Cyberscience (or at least we couldn't) that can walk you through how to do it because they obviously aren't going to support QAD (even though their sales people will give a plug that it "integrates" with ...
