Answered: a. A fan cart, with frictionless wheels... | bartleby

Then, when the force on the cart was .98 Newtons, the average acceleration was 1.63 m/s/s. This is a marked increase in acceleration and force which starts a pattern that is continued for the next set of trials in which the force was 1.96 Newtons. When the force exerted on the cart was 1.96 Newtons, the average acceleration was 2.87 m/s/s.

Newton's Second Law Lab Answers | SchoolWorkHelper

Correct Answer: B. Cart B. A cart with one fan on it blowing to the left and carrying one block produces the x vs t graph shown. If this cart were carrying three blocks instead of one, with the fan still blowing the same direction, what could the x vs t graph look like?
