Topic 7: Magnetism and Electromagnetism. Topic 8: Space Physics. Practical Skills. Follow PMT Education on Instagram for daily revision, updates and more

AQA GCSE (9-1) Physics Revision - PMT

$B = F/L$ This defines flux density, B. We can measure F using the current balance. If the current cuts across the magnetic field at the angle θ then the component the current across the field is $I \sin \theta$ and therefore $F = B I L \sin \theta$. θ is the angle the current makes with the magnetic field. F (force) is at its maximum when $\theta = 90$ degrees ...

A-level Physics/Forces, Fields and Energy/Electromagnetism ...

Differentiated worksheet focusing on the $F=ma$ Equation. Easy gets pupils used to the units and rearrangements of the equation. Medium requires application of the equation and its rearrangements.
