### Harley Davidson Air Cooled Engine

Liquid-cooled Street Rod. We asked if the liquid-cooled Street range of 500, 750 and Street Rod would grow and replace the air-cooled Sportster. Like all Harley executives, Peter would not talk about coming models. However, he said the Street range would not replace the Sportster and that their air-cooled engines still had plenty of life in them.

### When will air-cooled Harleys end? - Motorbike Writer

The Evolution engine (popularly known as Evo) is an air-cooled, 45-degree, V-twin engine manufactured from 1984 by Harley-Davidson for the company's motorcycles. It was made in the 1,340 cc (82 cu in) displacement for Harley-Davidson Big V-twins bikes, replacing the Shovelhead engine until 2000 when the last EVO was placed in a production factory custom FXR4 (FXR2 and FXR3 were the first CVOs).

### Replacement and Crate Engines | Harley-Davidson USA

The Harley-Davidson Milwaukee-Eight engine is the ninth generation of "big twin" engines developed by the company, but only Harley's third all-new Big Twin in 80 years, first introduced in 2016. These engines differ from the traditional Harley Big Twin engines in that there are four valves per cylinder, totaling eight valves, hence the name.

### Harley-Davidson Milwaukee-Eight engine - Wikipedia

Has Harley really gone water-cooled? When Harley launched the 2014 model range this week they introduced a new Twin-Cooled 103 and 110 engine to the range. By Twin-Cooled they mean that water and coolant is used to cool the heads near the exhaust ports where most of the heat is generated. It seems this has largely been done for rider comfort and to pass tough new emissions laws. It doesn't ...
