Head First Html5 Programming
Although I do have a copy of Head First C#, but the style, manner of delivery, patience and humour in this book (Head First Javascript) make it an awesome read. It is by far the best value for money book I have bought in a LONG time (and trust me, I buy loads of books) - including or especially programming books.

While not technically an HTML element, the DOCTYPE declaration should be the first thing to appear in every HTML document. This declaration tells the browser the language of the code in the document. In the past, this declaration included several parts and could get a little complicated. However, in HTML5, it's quite simple: <!DOCTYPE html>

8 Invalid HTML Elements You Should Stop Using Immediately
Definition and Usage. The fill() method fills the current drawing (path). The default color is black. Tip: Use the fillStyle property to fill with another color/gradient. Note: If the path is not closed, the fill() method will add a line from the last point to the startpoint of the path to close the path (like closePath()), and then fill the path.

HTML canvas fill() Method - W3Schools
Adding to the previous answer... make sure to add sourceBuffer.mode = 'sequence' in the MediaSource.onopen event handler to ensure the data is appended based on the order it is received. The default value is segments, which buffers until the next 'expected' timeframe is loaded. Additionally, make sure that you are not sending any packets with a data.size === 0, and make sure that there is ...
