Juniper recognized this by building a truly scalable and versatile building block for the architecture of the future: the SRX Series. Thanks to its innovative design, the very same SRX Series device can evolve along with you on your journey from secure router to SD-WAN to, ultimately, a full SD-Enterprise.

Juniper SRX Series: 1 Million Sold and Counting ...

The predecessors to the SRX Series products are the legacy ScreenOS products. They really raised the bar when they were introduced to the market, first by NetScreen and then by Juniper Networks. Many features might be remembered as notable, but the most important was the migration of a split firewall software and operating system (OS) model.
