By definition, the bottom billion constitutes to the “1 billion” populace that thrive in the 58-60 impoverished economies. Adhering heavily on the statistical data, Collier infers that “as of 2006, around 980 million living in “trapped” countries”. 73% of the populace is in Africa.

The Bottom Billion: Why the Poorest Countries Are Failing ...

In the universally acclaimed and award-winning The Bottom Billion, Paul Collier reveals that fifty failed states--home to the poorest one billion people on Earth--pose the central challenge of the developing world in the twenty-first century. The book shines much-needed light on this group of small nations, largely unnoticed by the industrialized West, that are dropping further and further behind the majority of the world's people, often falling into an absolute decline in living standards.

Amazon.com: The Bottom Billion: Why the Poorest Countries ...

The Bottom Billion: Why the Poorest Countries are Failing and What Can Be Done About It is a 2007 book by Paul Collier, Professor of Economics at Oxford University, exploring the reasons why impoverished countries fail to progress despite international aid and support. In the book Collier argues that there are many countries whose residents have experienced little, if any, income growth over the 1980s and 1990s. On his reckoning, there are just under 60 such economies, home to almost 1 billion p

The Bottom Billion - Wikipedia

The Bottom Billion begins by outlining various development traps, reasons countries of the bottom billion struggle to escape from extreme poverty. The four traps are conflict, natural resources, being landlocked and bad governance.
