Jim Redcrow is a Métis teenager who helps his father and uncle run a trapline in northern Alberta. As part of his duties, Jim maintains the family dog team that is used to haul supplies to and from the trapline. Times are hard and Jim will lose his dogs unless he can figure another way for them to earn their keep. He enters a grueling three-day race that tests the limits of his team. Tempted to win at all costs, he comes to realize the price may be too high. TYPIX is a critical compilation of crystallographic data prepared by E. Parthé at the University of Geneva. It contains over 3200 compounds representative of the structure types found among inorganic compounds. This work contains condensed crystal chemical information about individual structure types as well as an extensive chapter on the crystal chemistry of particular structure families. The aim of the compilation is to clarify and classify published data for intermetallic and other inorganic structures (types found exclusively with halides or oxides are only included for a few special cases). It provides a tool for additional crystal chemical studies and the development of new materials. A comprehensive and research-based text detailing the important relationship between school administration and human resources administration. "The author provides [students] with specific strategies for navigating the treacherous waters of personnel selection, development, retention, and removal. I wish I had the book when I began my work as Director of Personnel." —Zach Kelehear University of South Carolina Human Resources Administration for Educational Leaders balances theory and pedagogy to demonstrate the historical evolution of the human resources function in education, the link between human resources and organizational effectiveness, and the new trends in human resources accountability. Key Features and Benefits: Provides students with samples of the tools that practicing HR administrators use for planning, recruiting, interviewing, selecting, evaluating, compensating, and developing staff personnel Dedicates separate chapters to areas often neglected in other texts: collective bargaining, human resources responsibility for classified personnel, accountability, and organizational climate and the human resources function Features engaging simulations in the form of case studies and critical questions to help students apply the concepts to practice Accompanied by High-Quality Ancillaries Instructors' Resources on CD-ROM includes a test bank, sample syllabi, PowerPoint slide presentations, and more. Contact SAGE to request your copy. Meet the author! <http://coe.asu.edu/elps/faculty/norton.php> The book opens by

underscoring the importance of teacher workload in education and its history of problems related to inequality of work assignments and its effect on student learning. Other chapters give special attention to how workload has been allocated historically. Best practices regarding teacher workload assignments are detailed in relation to best student learning outcomes. How to measure teacher workload and make necessary load adjustments are set forth in various strategies and innovative programming. Find the essential information you need to safely administer more than 400 intravenous drugs! For nearly 50 years, Elsevier's *Intravenous Medications: A Handbook for Nurses and Health Professionals* has been a trusted resource for complete, accurate drug information in a concise, quick-access format. New to the 2023 edition are 10 monographs of the most recent IV drugs to be approved by the FDA, in addition to updated drug uses, interactions, precautions, alerts, and patient teaching instructions for all current IV drugs. Known as the #1 IV drug handbook on the market, this annual publication is ideal for use in critical care areas, at the nursing station, in the office, and in public health and home care settings. Detailed monographs on more than 400 IV drugs provide an impressive breadth of coverage that goes well beyond any comparable drug reference. Individual monographs include the drug name, phonetic pronunciation, usual dose, dilution, compatibility, rate of administration, actions, indications and uses, contraindications, precautions, interactions, side effects, antidote, and more. Additional drug monographs are provided on the Evolve website. Highlighted Black Box Warnings make it easy to locate information on medications with serious safety risks. Blue-screened text calls attention to special circumstances not covered by Black Box Warnings. Dosage and dilution charts within monographs provide quick summaries of essential clinical information. Life-stage dosage variances are highlighted for geriatric, pediatric, infant, and neonatal patients. Convenient, A-to-Z format organizes all drug monographs by generic name, allowing students to find any drug in seconds. Spiral binding allows the book to lie flat, leaving the practitioner's hands free to perform other tasks. NEW! Drug monographs for 10 newly approved drugs by the FDA include the most current information. NEW! Updates on drug uses, interactions, precautions, alerts, and more are included throughout the guide to reflect changes to existing medications. Collection of selected, peer reviewed papers from the the International Symposium on Metallography (Metallography 2013), April 24–26, 2013, Stará Lesná, Slovak Republic. Volume is indexed by Thomson Reuters CPCI-S (WoS). The 123 papers are grouped as follows: Invited Lectures, I. Prediction, Process Simulation and Metallographic Methods, II. Solidification and Solid State Transformation, III. Welding, IV. Interrelationship between Microstructure and Material Properties, V. Fractures, Defects and Material Degradation, VI. Fatigue and Creep, VII. Nonferrous Alloys, VIII. Powder Metallurgy, Composites, Ceramics, Superconductors and Metallic Glasses, IX. Coatings and Nanomaterials, X. Metallography in Archaeology (Archaeometallurgy) The aim of this reference work is to provide the researcher with a comprehensive compilation of all up to now crystallographically identified inorganic substances in only one volume. All data have been processed and critically evaluated by the "Pauling File" editorial team using a unique software package. Each substance is represented in a single row containing information adapted to the number of chemical elements.
