Psychology has been interested in the well-being and performance of people at work for over a century, but our knowledge about both issues, and how they relate to each other, is still evolving. Including contributions from a range of international experts, the book begins with a conceptual framework for understanding both concepts, before showing how a variety of different contexts, both organizational and personal, impact upon well-being and performance. The book includes chapters on specific job roles, from creative work to service positions, as well as the importance of HR policies and how the individual worker can determine their own well-being and performance. Use in classrooms and personal studies; includes high-interest reading passages, contextualized vocabulary practice, and word skills and writing activities. Language is at the heart of the learning process. We learn through language. Our knowledge about the world is constructed in language-the worlds of home and the community, the worlds of school subjects, the worlds of literature, the worlds of the workplace, and so on. It is through language that we interact with others and build our identities. Teachers' explanations, classroom discussions, assessment of student achievement, and students' understanding, composition, and evaluation of texts are all mediated through language. In this book, the authors explore how an explicit understanding of how language works enables students to make informed choices in their use and understanding of texts. Teaching Language in Context 2e is an introduction to the language that students encounter in the

various curriculum areas as they move through the years of schooling and it will enable teachers to: - plan units of work that are sensitive to the language demands placed on students - design activities with a language focus - select texts for reading at an appropriate level - analyse texts to identify relevant language and visual features - create teaching materials that integrate an awareness of language - help students to access meanings created through a variety of media (written, spoken, visual, multimodal) - provide explicit support in developing students' writing and composing - assess students' written work - extend students' ability to articulate what they are learning. In this second edition, there is an increased emphasis on the multimodal nature of texts, particularly the relationship between image and language, and the place of visuals in supporting students to master the literacy demands of the curriculum. The book also recognises the increasingly elaborate texts found in the more complex literacy tasks of upper primary and lower secondary classrooms.

Principles of Economics in Context lays out the principles of micro- and macroeconomics in a manner that is thorough, up to date, and relevant to students, attuned to the economic realities of the world around them. It offers engaging treatment of important current topics such as new thinking in behavioral economics, financial instability and market bubbles, debt and deficits, and policy responses to the problems of unemployment, inequality, and environmental sustainability. This new, affordable edition combines the just-released new editions of Microeconomics in Context and Macroeconomics in Context to provide an

integrated full-year text covering all aspects of both micro and macro analysis and application, with many up-to-date examples and extensive supporting web resources for instructors and students. Key features include: An eye-opening statistical portrait of the United States; Clear explanation of basic concepts and analytical tools, with advanced models presented in optional chapter appendices; Presentation of policy issues in historical, institutional, social, political, and ethical context--an approach that fosters critical evaluation of the standard microeconomic models, such as welfare analysis, labor markets, and market competition; Issues of human well-being, both domestic and global, are given central importance, enriching the topics and analytical tools to which students are introduced; The theme of sustainability--financial, social, and ecological--is thoroughly integrated in the book, with chapters on alternatives to standard GDP measurement, the environment, common property, public goods, and growth and sustainability in the twenty-first century; Full complement of instructor and student support materials online, including test banks and grading through Canvas. As the most comprehensive text of its kind, *Social Work in Health Settings* introduces social work students to a range of clients and provides an overview of many social work settings and services in the health arena. If you're a practitioner, you'll find the book useful for examining and evaluating your practice. This second edition features 18 new chapters and chapter subjects and rewritten and updated versions of the 14 chapters which were part of the first edition. Research in the College

Each technique is thoroughly presented with accompanying examples, advice for designing research projects, and tips for data collection, analysis, and dissemination of results. Clearly organized and accessible, this volume is the essential guide for experienced and novice researchers. This major work offers a range of new cases and materials which help to explain the law of human rights in a broad context. Recipient of the 2017 Most Promising New Textbook Award from the Textbook & Academic Authors Association (TAA) Chronologically organized, Lifespan Development: Lives in Context offers a unique perspective on the field by focusing on the importance of context—examining how the places, sociocultural environments, and ways in which we are raised influence who we become and how we grow and change. Author Tara L. Kuther integrates cutting-edge and classic research throughout the text to present a unified story of developmental science and its applications to everyday life. Robust

pedagogy, student-friendly writing, and an inviting design enhance this exciting and inclusive exploration of the ways in which context informs our understanding of the lifespan. This unique book uses actual litigation documents and contexts so that students learn doctrine and skills in a real-life setting. Rule and statute deconstruction, case reading, and organizing/synthesizing materials are explicitly taught along with doctrine and are linked to law practice tasks. Introductory materials in each section provide a framework for understanding the material, and questions and exercises help students apply the materials to further their understanding. The user-friendly combination of skills instruction with doctrine is geared to a variety of learning styles. The teacher's manual includes multiple choice questions, PowerPoint slides and suggested materials (instant feedback forms, YouTube video links, etc.). This book is part of the Context and Practice Series, edited by Michael Hunter Schwartz, Professor of Law and Dean of the McGeorge School of Law, University of the Pacific. A substantial revision to a classroom favorite Explore the literature, history, and social context of the Old Testament/Hebrew Bible and their relevance for making sense of this ancient collection. This significant revision of a classroom standard pays particular attention to the original Mediterranean context--how it differs from modern Western culture--and its importance for interpretation. The significance of critical scholarly methods as well as the value of archaeology are likewise explored. Designed with the realities of the classroom in mind, it includes helpful illustrations, insets, and maps; study questions; a

glossary; and indexes of subjects, personal and place names, and Scripture citations. MyPsychLab is an interactive online solution for Psychology courses. This site gives you access to a wealth of resources all geared to meet individual learning needs. MyPsychLab combines multimedia, tutorials, simulations, tests, and quizzes to make learning fun! This access code gives you access to all of MyPsychLab's grade-boosting resources. Access code also includes a complete E-Book of Kosslyn/Rosenberg, *Fundamentals of Psychology in Context, 3/e*. Greatly expanded, revised and updated, with an entirely new chapter on disability, *The Social Context of Birth, Second Edition* provides an essential understanding of how social issues affect midwives, the birth process and motherhood. Childbirth is much more than a biological event or a set of case notes. No-one has an uneventful pregnancy, and women seek narratives through which they can explain and try to make sense of what has happened to them. This is often neglected in the relentlessly technocratic modern culture of childbirth. Appreciating the social context surrounding an individual enriches the understanding a midwife must have if she is to work successfully alongside a woman and her family throughout a pregnancy and birth in an insightful, intelligent and informed manner. This comprehensive guide provides countless valuable insights for midwives, nurses, obstetricians and health visitors into the many different lives, experiences and expectations of women in their childbearing years, their babies and families in the 21st Century. Written by a team of highly experienced health professionals, it also covers

contentious areas of maternity care, such as new reproductive technologies and fetal surveillance. The second edition retains the style, format, and teaching and learning goals of the first edition, but some cases have been replaced or re-edited, and many of the textual materials, problems, exercises, and case questions have been revised, supplemented, or updated. This book is part of the Context and Practice Series, edited by Michael Hunter Schwartz, Professor of Law and Dean of the McGeorge School of Law, University of the Pacific. PowerPoint slides are available to professors upon adoption of this book. Download sample slides from the full 457-slide presentation here. Examining carefully the Egyptian epic hexameter production from the 3rd to the 6th centuries AD,

especially that of the southern region (Thebaid), this study provides an image of three centuries in the history of the Graeco-Egyptian literature, in which authors and poetry are related directly to the social-economic, cultural and literary contexts from which they come. Laura Miguélez Cavero demonstrates that the traditional image of a “school of Nonnos” is not justified ? rather, Triphiodorus, Nonnus, Musaeus, Colluthus, Cyrus of Panopolis and Christodorus of Coptos are just the tip of a literary iceberg we know of only to some extent through the texts that papyri offer us. TEACHING LANGUAGE IN CONTEXT, THIRD EDITION is the essential methods text for anyone teaching or learning to teach a foreign language. TEACHING LANGUAGE IN CONTEXT combines an updated, comprehensive, readable review of the literature, a thorough bibliography, and sample activities and approaches that effectively model the methodology.
