The Marrying Kind? Jun 08 2021 As the fight for same-sex marriage rages across the United States and lesbian and gay couples rush to marriage license counters, the goal of marriage is still fiercely questioned within the LGBT movement. Rarely has an objective so central to a social movement's political agenda been so

controversial within the movement itself. While antigay forces work to restrict marriage to one man and one woman, lesbian and gay activists are passionately arguing about the desirability, viability, and social consequences of same-sex marriage. *The Marrying Kind?* is the first book to draw on empirical research to examine these debates and how they are affecting marriage equality campaigns. The essays in this volume analyze the rhetoric, strategies, and makeup of the LGBT social movement organizations pushing for same-sex marriage, and address the dire predictions of some LGBT commentators that same-sex marriage will spell the end of queer identity and community. Case studies from California, Connecticut, Massachusetts, New Jersey, Oklahoma, Vermont, and Canada illuminate the complicated politics of same-sex marriage, making clear that the current disagreements among LGBT activists over whether marriage is conforming or transformative are far too simplistic. Instead, the impact of the marriage equality movement is complex and often contradictory, neither fully assimilationist nor fully oppositional.

Antistatic Sprays Mar 30 2023 Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast

voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

Freaks Like Me Dec 03 2020 Georgie was just a typical teenager when it happened; she was studying hard for a place at her dream university and having fun with her friends on weekends. Spoilt Ballots May 20 2022 If you paid even a moment's attention during high-school history class, you probably know that 1910 brought about the Union of South Africa, that the 1948 general election ushered in apartheid, and that the Rainbow Nation was born when Madiba triumphed in the country's first democratic elections in 1994. Spoilt Ballots dishes the dirt on these pivotal turning points in our history. But it also sheds light on a dozen lesser-known contests, starting with the assassination of King

Shaka in 1828 and ending with the anointing of King Cyril at Nasrec in 2017. Spoilt Ballots dishes the dirt on these pivotal turning points in our history. But it also sheds light on a dozen lesser-known contests, starting with the assassination of King Shaka in 1828 and ending with the anointing of King Cyril at Nasrec in 2017. Spoilt Ballots is as much about the people who voted in some of our most decisive elections as it is about those who didn't even get the chance to make their mark. It explains why a black man in the Cape had more political rights in 1854 than at any other point in the ensuing 140 years and how the enfranchisement of women in 1930 was actually a step back for democracy. The book will leave you wondering if Oom Paul Kruger's seriously dicey win in the 1893 ZAR election might have paved the way for the Boer War and whether 'Slim Jannie' Smuts really was that slim after all. It'll explain how the Nats managed to get millions of English-speakers to vote for apartheid and why the Groot Krokodil's attempt to co-opt coloureds and Indians into the system backfired spectacularly. Entertaining and impeccably researched, Spoilt Ballots lifts the lid on 200 years of electoral dysfunction in our beloved and benighted nation.

Smarter Faster Better Nov 25 2022 In the international bestseller *The Power of Habit*, Pulitzer Prize-winning journalist Charles Duhigg explained why we do what we do. In *Smarter Faster Better*, he applies the same relentless curiosity, rigorous reporting and rich storytelling to explain how we can get better at the things we do. The result is a groundbreaking exploration of the science of productivity. A group of data scientists at Google embark on a

four-year study of how the best teams function, and find that how a group interacts is much more important than who is in the group. A Marine Corps general, faced with low morale among recruits, reimagines boot camp - and discovers that instilling a 'bias toward action' can turn even the most directionless teenagers into self-motivating achievers. The filmmakers behind Disney's Frozen are on the brink of catastrophe - until they shake up their team in just the right way, spurring a creative breakthrough that leads to one of the highest-grossing movies of all time. What do these people have in common? They know that productivity relies on making certain choices. The way we frame our daily decisions; the big ambitions we embrace and the easy goals we ignore; the cultures we establish as leaders to drive innovation: these are the things that separate the merely busy from the genuinely productive. At the core of Smarter Faster Better are eight key concepts - from motivation and goal-setting to focus and decision-making - that explain why some people and companies get so much done. Drawing on the latest findings in neuroscience, psychology and behavioural economics - as well as the experiences of CEOs, educational reformers, four-star generals, airplane pilots and Broadway songwriters - this painstakingly researched book explains that the most productive people, companies and organizations don't merely act differently. They view the world, and their choices, in profoundly different ways.

Santro Jul 22 2022 `There's no business like the car business!` Within months of its launch in late 1998, with every well-known global automobile brand jockeying for a foothold in a small-car market almost monopolized by Maruti Udyog Limited, Hyundai Motor India's debut production, the Santro, emerged as a force to reckon with. The first car to be conceptualized and designed for ? and then developed and manufactured in ? India, the `Sunshine Car` has, over a period of sixteen years, set the record for the quickest small car brand to go from zero to one million units sold. It achieved profitability for Hyundai at an unprecedented speed and made an impressive global impact as a made-in-India automobile in markets as diverse as Algeria and Zimbabwe, Western Europe and

North America. In *Santro: The Car That Built a Company*, BVR Subbu, who spearheaded much of the Santro's success, reveals the hitherto untold story of how this small car made such a big impact. Vivid anecdotes detail the challenges of introducing a new product in a new market, the canny business strategies that were employed to get the better of rival brands, the unforgettable marketing campaigns that made all the difference ? and the thrills of the high-stakes power battles and everyday drama that characterize corporate India. Achtung-Panzer! Aug 23 2022 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

An Introduction to Sustainable Transportation Dec 15 2021 Transportation plays a substantial role in the modern world; it provides tremendous benefits to society, but it also imposes significant economic, social and environmental costs. Sustainable transport planning requires integrating environmental, social, and economic factors in order to develop optimal solutions to our many pressing issues, especially carbon emissions and climate change. This essential multi-authored work reflects a new sustainable transportation planning paradigm. It explores the concepts of sustainable development and sustainable transportation, describes practical techniques for comprehensive evaluation, provides tools for multi-modal transport planning, and presents innovative mobility management solutions to transportation problems. This text reflects a fundamental change in transportation decision making. It focuses on accessibility rather than

mobility, emphasizes the need to expand the range of options and impacts considered in analysis, and provides practical tools to allow planners, policy makers and the general public to determine the best solution to the transportation problems facing a community. Students of various disciplines, planners, policymakers and concerned citizens will find many of its provocative ideas and approaches of considerable value as they engage in the processes of understanding and changing transportation towards greater sustainability.

Marcello Gandini Mar 06 2021 That Marcello Gandini is one of the greatest of automobile designers ever has never been disputed, and whether he is the greatest ever, only time and the directions automobile design takes, will tell. But there is no doubting Marcello Gandini's immense impact on automobile design in the last four decades of the 20th century that still remains valid well into the 21st century. the Lamborghini Miura to the Maserati Quattroporte IV, the humble Innocenti Mini to the epic Cizeta V16T, Marcello Gandini has designed some of the most epochal of all automobiles. Iconic cars like the first-generation BMW 5 Series, the Audi 50/VW Polo, the Fiat X1/9, the Lamborghini Countach and the Diablo, the Lancia Stratos, the Renault Magnum super truck, and many others have all flowed his stylistic pen. -- Designing automobiles that really defined the late 1960s, 1970s, 1980s, even the 1990s, Marcello Gandini is, arguably, the one man who had the greatest impact, the one who changed automotive design the most.
