Unicorn Myth and Reality. Western art of America's frontier years, from about 1825 to 1925, has traditionally been perceived as the art most representative of the country's cultural and historical essence. European American explorers were accompanied or soon followed by adventuresome artists whose drawings and paintings provided the first glimpses that eastern audiences had of this vast region and captured both its romantic allure and its commercial possibilities. The artists - Albert Bierstadt, George Catlin, Marsden Hartley, Alfred Jacob Miller, Thomas Moran, Fanny R. Palmer, Frederick Remington, Charles M. Russell, and John Mix Stanley, among others - presented a fabulous vision of the West that was at once Edenic and bountiful as well as dangerous and forbidding. This text is a general introduction to American judicial process. The authors cover the major institutions, actors, and processes that comprise the U.S. legal system, viewed from a political science perspective. Grounding their presentation in empirical social science terms, the authors identify popular myths about the structure and processes of American law and courts and

then contrast those myths with what really takes place. Three unique elements of this "myth versus reality" framework are incorporated into each of the topical chapters: 1) "Myth versus Reality" boxes that lay out the topics each chapter covers, using the myths about each topic contrasted with the corresponding realities. 2) "Pop Culture" boxes that provide students with popular examples from film, television, and music that tie-in to chapter topics and engage student interest. 3) "How Do We Know?" boxes that discuss the methods of social scientific inquiry and debunk common myths about the judiciary and legal system. Unlike other textbooks, *American Judicial Process* emphasizes how pop culture portrays—and often distorts—the judicial process and how social science research is brought to bear to provide an accurate picture of law and courts. In addition, a rich companion website will include PowerPoint lectures, suggested topics for papers and projects, a test bank of objective questions for use by instructors, and downloadable artwork from the book. Students will have access to annotated web links and videos, flash cards of key terms, and a glossary. In this riveting insider's account, a former inspector general of the CIA compares actual espionage cases and practices with classic and popular spy fiction, showing that the real world of espionage is nearly always stranger and more complicated than even the best spy fiction. Exploring everything from tradecraft and recruitment to bureaucracy and betrayal, *The Great Game* contrasts fictional spies created by such authors as John Le Carré, Tom Clancy and Joseph Conrad with their real-life counterparts from Kim Philby to Aldrich Ames. Drawing on his thirty year career with the CIA, Frederick P. Hitz shows that even the most imaginative authors fail to capture the profound human dilemmas raised by real-life cases. Engaging and insightful, *The Great Game* shines a fascinating light on the veiled history of intelligence. It was the year of the glorious Battle of Britain, of the heroic evacuation of Dunkirk. It was the time when the mighty British empire declared its intention to fight the Nazis—alone if necessary—to the bitter end. It was, as Churchill dubbed it, Britain's "Finest Hour." In *1940: Myth and Reality*, Clive Ponting reveals that it was nothing of the sort. Britain was broke in 1940 and utterly dependent on the United States for economic aid. The government fabricated German casualty figures after the Battle of

Britain, suppressed knowledge of the complete fiasco that led to Dunkirk, and actually tried secretly to sue for peace that year. The British people were at best grimly resigned to the war; at worst they suffered appalling privations. Without denigrating the heroism of individuals, Mr. Ponting offers a startling account of the ineptitude and propaganda that marked much of 1940: Britain's stormy relations with France, its bizarre attempts to force a united Ireland, and the unpopularity of Winston Churchill. While he made rousing speeches in the House of Commons, Churchill rarely broadcast to the nation: his stirring "we shall fight on the beaches" speech was in fact broadcast by the actor who played Larry the Lamb on Children's Hour.

Frauensport, Frauen. Haitian Vodou breaks away from European and American heuristic models for understanding a religio-philosophical system such as Vodou in order to form new approaches with an African ethos. The contributors to this volume, all Haitians, examine the potentially radical and transformative possibilities of the religious and philosophical ideologies of Vodou and locate its foundations more clearly within an African heritage. Essays examine Vodou's roles in organizing rural resistance; forming political values for the transformation of Haiti; teaching social norms, values, and standards; influencing Haitian culture through art and music; merging science with philosophy, both theoretically and in the healing arts; and forming the Haitian "manbo," or priest. Explore biblical theology with monographs from a diversity of experts. The Studies in Biblical Theology series includes a wealth of resources to help you understand the development of various doctrines, concepts, and terminology across the Old and New Testaments. Fine-tune your understanding of Jesus' ministry by exploring his wilderness experience and the nature of his mission. Delve into detailed word studies, investigate Christological titles used by Paul, and come to a new appreciation of the Ten Commandments. These in-depth treatments will give you a better grip on key theological themes found throughout the Bible. The papers in this volume were among the contributions presented at an international symposium, Ancient Marriage in Myth and Reality, which was held at the Swedish Institute in Rome in October 2006. The

symposium was held under the aegis of ARACHNE—the Nordic network for women's history and gender studies in Antiquity. The study of ancient marriage has been largely the province of historians working with texts, and the result of this was an emphasis on elite marriages discussed by the male writers of the upper classes and on laws pertaining to marriage. Neither area has been exhausted, as several essays in this new international collection indicate, but the balance among the papers reveals the shift in focus. Along with innovative readings of authors from Livy to Porphyry, we find examinations of demographic and contractual evidence as well as inscriptions and visual imagery. Among the contributors to the volume are: Pauline Schmitt Pantel, Judith Evans Grubbs, Ray Laurence, Marjatta Nielsen and Mary Harlow.

Are you strong enough to handle the truth about your faith and belief? Since infancy you have been taught stories from the Bible. Did you know that they are simply myths and superstitions, gathered together from the veils of antiquity? The priests of the ancient world were seeking a new method of power and control over the masses. In this book you will be given truths and directed to paths of reality. All religions are created for control and wealth. Jesus never existed and there is no evidence that a benevolent God watches over his children. There is also the same lack of proof that an Allah, a Buddha, or a Krishna ever existed or exists today. What we have developed is a path to the total destruction of mankind. Our planet earth is being torn apart by foolish beliefs which are promoted and supported by the weaknesses of a mass of human beings who have to have a security blanket. Collectively the nations of the world are on an inevitable collision course and the cause is religion. This is the ultimate results of a child's game of, "my God is bigger than your God " This book is a profound reexamination of the role of the German army, the Wehrmacht, in World War II. Until very recently, the standard story avowed that the ordinary German soldier in World War II was a good soldier, distinct from Hitler's rapacious SS troops, and not an accomplice to the massacres of civilians. Wolfram Wette, a preeminent German military historian, explodes the myth of a "clean" Wehrmacht with devastating clarity. This book reveals the Wehrmacht's long-standing prejudices against Jews, Slavs, and Bolsheviks, beliefs that predated the prophecies of

"Mein Kampf" and the paranoia of National Socialism. Though the sixteen-million-member German army is often portrayed as a victim of Nazi mania, we come to see that from 1941 to 1944 these soldiers were thoroughly involved in the horrific cleansing of Russia and Eastern Europe. Wette compellingly documents Germany's long-term preparation of its army for a race war deemed necessary to safeguard the country's future; World War II was merely the fulfillment of these plans, on a previously unimaginable scale. This sober indictment of millions of German soldiers reaches beyond the Wehrmacht's complicity to examine how German academics and ordinary citizens avoided confronting this difficult truth at war's end. Wette shows how atrocities against Jews and others were concealed and sanitized, and history rewritten. Only recently has the German public undertaken a reevaluation of this respected national institution--a painful but necessary process if we are to truly comprehend how the Holocaust was carried out and how we have come to understand it.

Stanley McChrystal, the retired US Army general and bestselling author of Team of Teams, profiles thirteen of history's great leaders, including Walt Disney, Coco Chanel, and Robert E. Lee, to show that leadership is not what you think it is—and never was. Stan McChrystal served for thirty-four years in the US Army, rising from a second lieutenant in the 82nd Airborne Division to a four-star general, in command of all American and coalition forces in Afghanistan. During those years he worked with countless leaders and pondered an ancient question:

“What makes a leader great?” He came to realize that there is no simple answer. McChrystal profiles thirteen famous leaders from a wide range of eras and fields—from corporate CEOs to politicians and revolutionaries. He uses their stories to explore how leadership works in practice and to challenge the myths that complicate our thinking about this critical topic. With Plutarch’s Lives as his model, McChrystal looks at paired sets of leaders who followed unconventional paths to success. For instance. . . . Walt Disney and Coco Chanel built empires in very different ways. Both had public personas that sharply contrasted with how they lived in private. . . Maximilien Robespierre helped shape the French Revolution in the eighteenth century; Abu Musab al-Zarqawi led the jihadist insurgency in Iraq in the twenty-first. We can draw surprising lessons from them about motivation and persuasion. . . Both Boss Tweed in nineteenth-century New York and Margaret Thatcher in twentieth-century Britain followed unlikely roads to the top of powerful institutions. . . Martin Luther and his future namesake Martin Luther King Jr., both local clergymen, emerged from modest backgrounds to lead world-changing movements. Finally, McChrystal explores how his former hero, General Robert E. Lee, could seemingly do everything right in his military career and yet lead the Confederate Army to a devastating defeat in the service of an immoral cause. Leaders will help you take stock of your own leadership, whether you’re part of a small team or responsible for an entire nation. Recent generations have experienced dramatic improvements in the quality of human life across the globe. Wars between states are fought less frequently and are less lethal. Food is more plentiful and more easily accessed. In most parts of the world, birthrates are down and life expectancy up. Significantly fewer people live in extreme poverty, relative to the overall population. Statistics would argue that the human race has never before flourished as it has in this moment. And yet, even with this progress, we face a number of seemingly intractable challenges to the welfare of both states and individuals, including: Governmental instability undermining the lives of citizens, both within and beyond their borders; Persistent and recurring intrastate conflict due to ineffective conflict management strategies; Marginally successful development efforts and growing income inequality, both within and between

nations, as a result of uncoordinated and ineffective global development strategies; Internecine conflict in multiethnic societies, manifested by exclusion, discrimination, and ultimately violence, the inevitable consequence of an insufficient focus on managing the inherent tensions in diverse societies; Global climate change with the possibility of catastrophic long-term consequences, following an inability to effectively come to terms with and respond to the impact of human activity on our environment. These challenges require a newly collaborative, intentional, and systematic approach. This book offers a blueprint for how to get there, calling for increased leadership responsibility, clarity of mission, and empowerment of states and individuals. It is designed to transform lofty but often vague agendas into concrete, measurable progress. It believes in the capacity of humanity to rise to the occasion, to come together to address these increasingly critical global problems, and offers one way forward.

Drawing on the works of literary masters, a cultural tour of Sicily draws on influences ranging from historical and political to archaeological and culinary while exploring how contemporary Sicilians remain steadfast to the beliefs and traditions of their ancestors. *The Secret King* is the first book to explode many myths surrounding the popular idea of Nazi occultism, while presenting the actual esoteric rituals used by Heinrich Himmler's SS under the influence of rune magician Karl-Maria Wiligut, the "Secret King of Germany." Stephen E. Flowers, PhD, is a prolific writer and translator in the fields of runology and the history of occultism. He is also the author of books on magical runic traditions under the pen name Edred Thorsson. Michael Moynihan co-authored the best-selling, award-winning book *Lords of Chaos*. He also co-edits the esoteric journal *Tyr*. Hountondji contends that ideological manifestations of this view that stress the uniqueness of the African experience are protonationalist reactions against colonialism conducted, paradoxically, in the terms of colonialist discourse. Hountondji argues that a genuine African philosophy must assimilate and transcend the theoretical heritage of Western philosophy and must reflect a rigorous process of independent scientific inquiry. More has probably been written about the Waterloo campaign than almost any other in history. It was the climax of the Napoleonic Wars and forms a watershed in

both European and world history. However, the lethal combination of national bias, wilful distortion and simple error has unfortunately led to the constantly regurgitated traditional 'accepted' version being significantly wrong regarding many episodes in the campaign. Oft-repeated claims have morphed into established fact and, with the bicentenary of this famous battle soon to be commemorated, it is high time that these are challenged and finally dismissed. Gareth Glover has spent a decade uncovering hundreds of previously unpublished eyewitness accounts of the battle and campaign, which have highlighted many of these myths and errors. In this ground-breaking history, based on extensive primary research of all the nations involved, he provides a very readable and beautifully balanced account of the entire campaign while challenging these distorted claims and myths, and he provides clear evidence to back his version of events. His thoughtful reassessment of this decisive episode in world history will be stimulating reading for those already familiar with the Napoleonic period and it will form a fascinating introduction for readers who are discovering this extraordinary event for the first time. The 5G Myth explains why the vision of 5G, the next generation in mobile telephony, heralded as a huge advance in global connectivity, is flawed and sets out a better vision for a connected future. It explains why insufficient technological advances and inadequate profitability will be problems in the widespread implementation of 5G. The book advocates a focus on consistent connectivity everywhere rather than fast speeds in city centers. William Webb looks back at the transitions through previous generations of mobile telephony and shows what simple extrapolations of trends would predict for 5G. He discusses whether the increases in speed and capacity promised by 5G are needed; if the required technology is available; whether a sound business case can be made for the deployment; and asks why, given this, the industry appears so supportive of 5G. He then puts forth the argument in favor of consistent connectivity of around 10Mbits/s everywhere as a more compelling vision and shows how it can be delivered via a mix of 4G and Wi-Fi. New realities are being created every moment. But how really are they

taking form? Certainly, an existing reality can't lead to a new one by itself. The genesis of new realities lies in-believe it or not-fiction. It is fictions, myths and legends-our imagination-that has shaped and is shaping our world. This highly evocative and analytical book digs deep into the secrets of consciousness of societies, religions and nations to unravel the myths of reality and reality of myths. Twenty-five original papers dealing with unconscious fantasy and its relationship with reality. General subjects covered are: theory, technique, applications, mythology, religion and belief, reality-sexuality, identity and biology, and psychopathology in clinical practice. Contributed seminar papers. This book offers an original interdisciplinary analysis of the relations between myth, identity and social reality, involving elements of narratology theory, linguistics, philosophy, anthropology and social theory, harnessed to support an argument firmly located in the area of literary criticism. This analysis yields a fairly extensive reinterpretation of the concept of myth, which is applied to the examination of the relationship between narrative and social reality as represented in texts by contemporary Scottish and Irish women writers. The main theoretical sources are Mikhail Bakhtin's theories of heteroglossia, Jacques Derrida's theories of citationality and Judith Butler's theories of subjectivity. The analysis framework developed in the book uses these theories to create a new way of understanding how literary texts change readers' worldviews by enticing them to accept alternative possibilities of cultural expression of identity and social order. The texts analysed in this book reconfigure naturalised stories that have become normative and constraining in conveying identities and visions of legitimate social orders. The book's focus on feminine identities places it alongside feminist analyses of reconstructions of fairy tales, myths or canonical stories that establish what counts as legitimate feminine identity. Studied here for the first time together, the writers whose texts form the interest of this book continue the revisionist work begun by other women writers who engage with the male generated literary, philosophical and humanist tradition. They share a view of narratives as tools for continually negotiating our identities, social worlds and socialisation scenarios. While the high-level theoretical discourse of

the first part of the book requires specialised knowledge, the second part of the book, offering close readings of the texts, is both lively and accessible and should engage the interest of the general reader and academic alike. This book is written for all those who are interested in the power words have to hold sway over our inner and outer (social) worlds. *Myth and Reality in Irish Literature* offers a rich collection of essays covering a wide spectrum of Irish literature from the early medieval saints and scholars to twentieth century writers such as Joyce and Beckett. The essays are written from both a personal and a scholarly perspective. Contributors to the volume include the Irish authors Denis Johnston, Thomas Kilroy, Kate O'Brien and Thomas Kinsella, and scholars David Greene, Denis Donoghue, Ann Saddlemyer and Shotaro Oshima. Of interest to students of English Literature as well as observers of the Irish scene, this book is of particular value to students of Irish heritage and literature. not just living that matters but living rightly. Over 2500 years after the city's fall, the Babylon of ancient Iraq is still an evocative name. The stories of the Tower of Babel, the Hanging Gardens, Daniel in the Lions' Den, the madness of Nebuchadnezzar and the "city of sin" still resonate today. But how much do we really know of the original city and the reality behind the myths, traditions, and stories? This lavishly illustrated volume sheds light for the first time on the true wonders of this ancient city and the echoes and images that have grown up around it over thousands of years. Babylon has carried complex and evolving meanings for artists through the ages and the authors bring together a wealth of art works inspired by this ancient city, from medieval manuscripts and major canvases to contemporary digital art. Alongside these later evocations of an imagined Babylon, the authors present the reality of the city: its kings, its history and its amazing structures, such as Nebuchadnezzar's magnificent state buildings with their famous glazed brick reliefs. They investigate the history, culture and religious life of the time, describing the Conquest of Jerusalem and the emergence of monotheism within Babylonian religion. They also demonstrate how ancient Babylon's legacy lives on today--in astronomy, astrology, and the origins of modern calendars and clocks. A final chapter considers the recent troubled history of the site of Babylon in today's Iraq. This book is published to accompany the major exhibition "Babylon" at the British Museum and draws on three of the most important collections of artifacts from the ancient city of Babylon, at the British Museum itself, the Musée du Louvre, and the Vorderasiatisches Museum, Berlin.
