Ford's Mustang is America's most popular pony car. Whether you're a collector, historian, or armchair enthusiast, you need all the specs and details that in sum define each Mustang year and model. Ford Mustang Red Book is your one-stop information shop--a key companion for shows, auctions or any venue where you need to quickly and easily access accurate reference data. From the first six-cylindered Mustang of the 1964-1/2 model year,

through fire-breathing, world-beating Boss and Shelby models, to 2015's all-new Mustang, Ford Mustang Red Book offers all the data and detail Mustang fans lust after. This is an in-depth look at all the Mustang models, including the anniversary and pace cars, and the specialty packages for street and competition driving that have made the Mustang an automotive legend. The key to client/server computing. Transaction processing techniques are deeply ingrained in the fields of databases and operating systems and are used to monitor, control and update information in modern computer systems. This book will show you how large, distributed, heterogeneous computer systems can be made to work reliably. Using transactions as a unifying conceptual framework, the authors show how to build high-performance distributed systems and high-availability applications with finite budgets and risk. The authors provide detailed explanations of why various problems occur as well as practical, usable techniques for their solution. Throughout the book, examples and techniques are drawn from the most successful commercial and research systems. Extensive use of compilable C code fragments demonstrates the many transaction processing algorithms presented in the book. The book will be valuable

to anyone interested in implementing distributed systems or client/server architectures.
